

The Art of Spirals

Ethan Huang, Ethan Hwang, Shaurya Guthula, Samuel Zhang

May 24, 2024

Introduction

We were interested in how different spirals with different patterns that have a specific mathematical rule that occurs all throughout nature. We also wanted to challenge ourselves and write a code to animate and visualize each of the different sequences and to include different aspects of the sequences.

Table of Contents

1. The Logarithmic Spiral Equation
2. The Archimedean Spiral Equation
3. Converting Polar Coordinates to Cartesian Coordinates
4. Fibonacci Sequence and The Golden Ratio
5. Spirals in Real Life

Logarithmic Spiral Equation
